

VersaPay is driving a sea-change in B2B accounts receivable.

VersaPay is reinventing the accounts receivable process to help companies strengthen customer relationships and get paid faster.

At VersaPay, we've created a leading B2B accounts receivable (AR) automation solution, ARC®, that is designed to revolutionize the way suppliers and their customers interact throughout the invoice-to-cash cycle. Our platform addresses key challenges in the AR process to help companies:

-  **Get paid faster:** speed up the invoice-to-cash cycle with online invoice presentment, automated payment reminders, real-time dispute management and flexible payment options.
-  **Save time and money:** eliminate inefficient manual processes and refocus AR teams on high-value work to advance business.
-  **Collect smarter:** enable efficient collections with a centralized view of customer accounts to prioritize follow-up, track account activity and increase cash flow.
-  **Apply cash easily:** speed up cash application by consolidating all payments in one place and enable staff to process invoices in larger volumes.
-  **Gain insight into AR:** full visibility into accounts receivable with an online dashboard to monitor key financial metrics and customer accounts to proactively forecast cash flow.
-  **Make customers happy:** A 24/7 self-service, online invoicing and payment portal that allows customers to view and pay invoices and manage accounts effectively.

About VersaPay:

- Founded in 2006
- Headquartered in Toronto, Ontario, Canada
- Utilized by over 100,000 B2B businesses throughout North America
- Publicly traded on Toronto Stock Exchange (TSX: VPY)
